## Project Design Phase-II Solution Requirements (Functional & Non-functional)

| Date          | 19 October 2022                          |
|---------------|--|
| Team ID       | PNT2022TMID33091                         |
| Project Name  | Analytics For Hospitals -Healthcare Data |
| Maximum Marks | 4 Marks                                  |

## **Functional Requirements:**

Following are the functional requirements of the proposed solution.

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task)   |
|--------|-------------------------------|--|
|        |                               |  |
| FR-1   |                               |  |
|        | Collect data                  | Data from various sources are collected using different methods in order to provide optimized results.                               |
| FR-2   | Data Cleaning and Wrangling   | When combining multiple data sources, there are many opportunities for data to be duplicated or mislabeled hence we cleanse the data |
| FR-3   | Creating data model           | The process of analyzing and defining all the data, as well as the relationships between those bits of data comes under this.        |
| FR-4   | Prediction and Analysis       | The hidden trends are analyzed and the final results are predicted using machine learning and AI algorithms.                         |
|        |                               |  |

## **Non-functional Requirements:**

Following are the non-functional requirements of the proposed solution.

| FR No. | Non-Functional Requirement | Description   |
|--------|----------------------------|---|
| NFR-1  | Usability                  | The project must be easy to use. The user needs to have a good experience while working with the interface.   |
| NFR-2  | Security                   | Every user can access the website only if they posses the password. The database is secured with encryption techniques which provides high levels of security               |
| NFR-3  | Reliability                | The project must have minimal degree of failure under normal usage and how often does the user get access to this work  |
| NFR-4  | Performance                | The project must respond quickly to the user's actions or even if the user has to wait the waiting period must be short.  |
| NFR-5  | Availability               | The project is platform independent. It runs perfectly on almost every platform.  |
| NFR-6  | Scalability                | The project allows multiple users to handle the data at the same time. It is highly scalable since adding features and making advancements in the website is uncomplicated. |
